Professional Summary

Senior Full-Stack Engineer & Tech Lead with 15+ years shipping production web apps — consumer marketplaces, B2B platforms, AI-driven fintech, and end-to-end products I own myself. Strongest on the frontend (React, Next.js, TypeScript, design systems) with confident ownership across Node.js, AWS, and CI/CD when a feature needs both ends of the stack. Started as a UI designer and still bring that instinct to every interface I ship.

Currently founding Carizmo (mobile car-wash SaaS live on iOS + Android) and freelancing at Diligent (YC W24) on the Paylane KYC/AML platform. Open to Senior / Lead Full-Stack or Frontend roles — remote-first, targeting EU / Germany / UAE / Saudi.

Technical Skills

Frontend — React · Next.js (App Router) · React Native · TypeScript · JavaScript (ES2024) · HTML5 · CSS3 · Tailwind · Radix / shadcn · Redux · GraphQL

Backend — Node.js · Express · Prisma · PostgreSQL · MongoDB · Redis · REST · tRPC · GraphQL · WebSockets

AI & Automation — OpenAI API · LangChain · RAG · vector databases · embeddings · Rasa NLP · Python

Cloud & DevOps — AWS (Lambda · Cognito · App Runner · CloudWatch · EC2 · S3) · Vercel · Docker · GitHub Actions · GitLab CI · Grafana

Testing & Quality — Playwright · Cypress · Vitest · Jest · React Testing Library · TDD

Design & Systems — Figma · Storybook · design tokens · component libraries · accessibility (WCAG) · Arabic RTL

Concepts — SSR / SSG / ISR · micro-frontends · performance budgets · observability · security best-practices in fintech

Selected Highlights

- **Founded Carizmo** — subscription-based mobile car-wash SaaS live on iOS + Android. Full monorepo (React Native, Next.js, Node.js, PostgreSQL, WhatsApp gateway, AWS). Own product, tech, and ops.
 - **Led React 19 upgrade** across 250+ files at Diligent with zero downtime — 30% developer-productivity gain, 65% reduction in security vulnerabilities.
 - **Migrated OLX Buyer Panel** from CSR to SSR — 30% Time-to-Interactive improvement, measurable conversion lift.
 - **Introduced TDD** across the OLX Buyer codebase — 40% reduction in production defects.
 - **Architected an i18n system** at Diligent supporting 4 languages across 180 files — eliminated 2,000+ hardcoded strings with automated validation.
 - **Published the Engineering Lead Handbook** (handbook.hanyrabah.com) — opinionated notes from 15+ years shipping.
-

Experience

Founder · Carizmo

Feb 2026 – Present · Cairo, Egypt · carizmo.app

Founded and operate a subscription-based on-demand mobile car-wash service for residents of Al Brouj Compound, Cairo. Live on iOS and Android. Own the platform end-to-end — product, tech, and ops.

- Built the full monorepo: React Native (Expo) customer app for iOS + Android, Next.js admin + landing + docs sites, Node.js + Express REST API, PostgreSQL on Supabase.
- Designed the domain model for subscriptions, service entitlements, wash-job state machines, and payment lifecycle — hardened by operating the business myself.
- Set up the WhatsApp Business gateway for customer notifications, OTP verification, and support flows via Twilio.

- Deployed the API to AWS EC2 and web apps to Vercel; own CI/CD, monitoring, and day-to-day operations.

Stack — React Native · Expo · Next.js · TypeScript · Node.js · Express · Prisma · PostgreSQL · Twilio · WhatsApp Business API · Docker · AWS · Vercel.

Co-Founder · A2gency

Jan 2026 – Present · Berlin, Germany (Remote) · [a2gency.ai](#)

Co-founded an agency building bespoke AI agents that integrate into how clients already work — automating repetitive roles, cutting operational cost, running 24/7. Not templates; every agent is designed around the client's processes, data, and objectives.

- Lead the technical direction: agent architecture, provider selection, retrieval pipelines, tool interfaces, and delivery.
- Ship production agent systems for client engagements across agencies and SMB operations.
- Own the technical stack decisions and integration patterns for how agents connect to client systems.

Stack — Next.js · TypeScript · AI SDK · LangChain · OpenAI API · Vercel.

Senior Full-Stack Engineer · Diligent (YC W24)

May 2025 – Present · Berlin, Germany (Remote, Freelance)

Contributing to Paylane — Diligent's secure platform for legal-entity data processing and KYC/AML compliance automation used by financial institutions.

- Ship full-stack features end-to-end across the platform in Next.js, React, TypeScript, and Node.js — owning slices from spec through production deployment.
- Build reusable component libraries and workflow primitives for the KYC and AML modules so new customer integrations land faster.
- Work directly with the founding team to scope technical work, prototype quickly, and validate decisions inside one-week iterations.
- Maintain Playwright E2E suites wired into GitHub Actions to keep deployment confidence high as the platform expands.
- Operate a serverless AWS stack — Cognito, Lambda, App Runner, CloudWatch — and contribute to ECS migration planning to improve streaming-response performance.

- Led the React 19 upgrade across 250+ files with zero downtime — 30% developer-productivity gain, 65% reduction in security vulnerabilities.
 - Architected an internationalization system supporting 4 languages across 180 files, eliminating 2,000+ hardcoded strings with automated validation.
 - Reduced onboarding time by 80% via a documentation suite + automated quality gates (ESLint, Husky, TypeScript, i18n).
-

Technical Lead, Full-Stack Engineering · HAYKALAH

Jan 2025 – Jul 2025 · Saudi Arabia (Remote, Part-time)

Led technical direction for AI-integrated client websites at a Saudi digital-transformation studio. Six-month scoped engagement covering team setup, architecture, and delivery handoff.

- Owned the engineering roadmap across client projects, architecture decisions, stack choices, and delivery cadence.
 - Partnered with executive leadership to translate ambiguous business briefs into scoped technical proposals and repeatable service offerings.
 - Set frontend architecture standards, component-driven structure, CI/CD pipelines, code-review norms — the team continues to operate after the engagement closed.
 - Shipped client websites integrating GenAI features (content generation, chat assistants, structured data extraction), working alongside designers and AI specialists.
 - Mentored mid-level developers on TypeScript, React patterns, and clean-code practices to lift the studio's baseline engineering quality.
 - Drove the technical foundation for DigitalNext, a scalable e-commerce and branding platform.
-

Senior Frontend Engineer / Team Lead · OLX Group

Mar 2021 – Nov 2024 · Berlin, Germany

Senior individual contributor and team lead across the Fixly, Service, and Buyer verticals on the global marketplace platform.

- Architected component-driven UIs in React, TypeScript, and GraphQL — applied SOLID principles so modules stayed independently extendable as the platform grew.
- Led the Buyer Panel migration from CSR to SSR — 30% Time-to-Interactive improvement.

- Introduced TDD with Jest across the Buyer codebase — 40% reduction in production issues.
 - Owned full E2E coverage in Cypress and Playwright; built and tuned GitLab CI/CD pipelines with performance and bundle-size budgets.
 - Documented every shared UI component in Storybook to clean up design dev handoffs across timezones.
 - Mentored junior and mid-level engineers through code review, pairing, and growth conversations — several promoted within 12 months.
-

Senior Frontend Consultant • [Tradeling.com](#)

Sep 2020 – Mar 2021 • Dubai, UAE

Senior frontend on the B2B MENA marketplace during pre-launch scaling.

- Built data-driven internal dashboards backed by REST and GraphQL APIs.
 - Contributed Storybook documentation alongside designers to align UI patterns across product teams.
-

Senior Frontend Engineer • [dubizzle.com](#)

Jun 2018 – Jun 2020 • Dubai, UAE

Consumer marketplace serving millions across the UAE.

- Collaborated with product managers, designers, and engineers to deliver a scalable design vision for consumer-facing marketplace products.
 - Orchestrated a new approach to assessing project requirements and priorities that increased production releases by 20%.
 - Designed and shipped high-performance, secure UI modules for the marketplace platform.
 - Revived the graphic standards and UX language guidelines to ensure brand consistency.
 - Ran pairing sessions and continuously researched new technologies for mobile web.
 - Scoped and planned A/B tests that measured user satisfaction for new features.
-

Frontend Engineer & UX/UI Designer • OLX

Jun 2015 – Jun 2018 • Dubai, UAE

Hybrid frontend + UX role supporting OLX Egypt and the wider MENA emerging-markets product.

- Localized OLX Egypt with Arabic-first design and full RTL support.
 - Replaced legacy CSS with SASS; migrated legacy UI to a component-based system of reusable primitives.
 - Designed and shipped new payment flows end-to-end, including Arabic copywriting and translation review.
 - Assessed website performance and applied enhancements that improved conversions.
-

Frontend Engineer & UI Designer · [dubizzle.com](#)

Jan 2014 – Jun 2015 · Cairo, Egypt

- Designed and shipped A/B tests across new feature flows; supported in-field user-testing rounds.
 - Researched and shipped the first internal dubizzle UI framework and documentation.
-

Earlier Experience

- **Interactive Team Lead** — Benchmark Advertising, Cairo (2011–2013): e-detailing apps for Pfizer, Novartis.
 - **Co-Founder & Frontend** — The Seven Layers, Cairo (2010–2013, part-time): product studio.
 - **Digital Team Lead** — Crinel, Cairo (2007–2010): built the Cairo digital team; web & mobile delivery.
 - **UI Designer** — intodevelopment, Cairo (2006–2007): first role out of university.
-

Education

B.Sc. Management Information Systems · El Shoruk Academy, Cairo, Egypt · 2001–2005

Languages

Arabic (Native) · English (Fluent) · German (A1)

Beyond Code

- **Engineering Lead Handbook** — handbook.hanyrabah.com — opinionated notes on leading frontend and full-stack teams: code review, API design, releases, coaching.
- **Selected writing** — hanyrabah.com/blog — essays on domain modeling, PRs, incremental migration, and field-service software.
